

## **DelSolar Modules Receive the “Made in EU” Certification Qualifying for the Italian Feed-In-Tariff 10% Premium**

Taipei, Taiwan, September 13, 2011 - DelSolar Co., Ltd. (OTSM: 3599) today announced that DelSolar PV modules qualify as “Made in the European Union”. The successful factory inspection performed by TÜV Rheinland (a member of IECEE and an accredited certification company by the GSE), enables DelSolar’s wide range of multi-crystalline PV modules with power output ranging from 125 Wp to 250 Wp offering added value to our customers. In addition, it confirms DelSolar’s status as a top-tier solar module supplier in the marketplace.

The new Italian regulation (Conto Energia IV) encourages the use of components “made in Europe”, which rewards PV projects that contain at least 60% local content with a 10% premium over normal feed-in tariff rates. The certification received by DelSolar satisfies the guidelines and requirements set forth by the Italian government.

R.C. Liang, Chairman and CEO of DelSolar said, “We are very pleased to receive the Made in EU certification that offers a great added value to our customers. In the future, DelSolar will continue to make the best endeavor to provide products with high quality and efficiency, as well as the best services to customers worldwide.”

### **About DelSolar Co., Ltd.:**

Founded in 2004 in the Hsinchu Science Park in Taiwan, DelSolar is dedicated to the research, development, and production of high-quality solar cells, modules, and photovoltaic (PV) systems. The company strives to become the world’s leading solar supplier through continuous innovation, outstanding

production processes, high yield rates, and world-class product efficiency.

DelSolar was established as a joint venture of Delta Electronics, Inc., and the Industrial Technology Research Institute (ITRI), a renowned technology development organization in Taiwan. Delta is the world's number one provider of switching power supplies, and also holds a leading position in the fields of automation, networking, and renewable energy. This alliance has generated great synergies, including strong in-house automation and an innovative R&D team, for DelSolar to develop and produce advanced solar photovoltaic products with state-of-the-art efficiency.

DelSolar is committed to providing clean and effective solar energy for a sustainable world. For further information, please see the company's website at: <http://www.delsolarpv.com>, or contact:
