

DeSolar Helps River of Life Church Go Green
October 29, 2009

River of Life Christian Church (ROLCC) at Silicon Valley, and **DeSolar Co. Ltd.**, a subsidiary of Delta Electronics Inc. based in Fremont, CA jointly announce their plan to install solar panels at ROLCC location in Santa Clara, CA.

ROLCC's roof top mounted solar arrays will be installed and commissioned by the end of 2009. The 117kW system will consist of approximately 510 230W high power DeSolar photovoltaic modules and will generate 180,800 kW hours of clean power annually, more than 4.5 million kWh over 25 years. The church will prevent approximately 5 million pounds of greenhouse gas emissions over 25 years, a significant fight against climate change.

Senior Pastor Reverend Tong Liu says his congregation is very excited about the opportunity to install solar power. ROLCC is very committed to the environment. Rev. Liu praises God for creating a beautiful world, for calling us to care for His creation, and giving us the minds, talent, and resources to provide that care. As stewards of God's creation who hold the earth in trust, the ROLCC community is called to use the earth's resources responsibly. Tapping into solar energy is one way to do good in the world, and it helps ensure a better world for future generations.

In addition to the environmental benefits, ROLCC will save on its electricity bill. Through a Solar Power Purchase Agreement (SPPA), ROLCC is able to go solar without any capital investment and save money from day one. As utility rates continue to rise, ROLCC's electricity bill savings will grow each year. The savings can be used elsewhere for missions, staff salaries, and creative ministries. From this perspective there is no economic reason not to do this project. It is completely self sufficient

ROLCC hopes to demonstrate the benefits of solar power to its own community and expects other congregations to follow its lead. Tapping into solar and other renewable sources to protect our environment fit well into the mission statement of any church.

DeSolar guarantees the performance of its solar panels for 25 years. Combined with its parent company, Delta's reputation and staying power, the result for its customers is a very reliable, secure, and cost-effective platform. Dr. R.C. Liang, Chairman and CEO of DeSolar says "DeSolar is dedicated to providing clean and effective solar energy to power as well as empower our world. In the next years, DeSolar expects to drive further development of larger-scale solar projects and show how benefiting the environment also makes good economic sense for its customers."

About River of Life Christian Church

River of Life Christian Church at Silicon Valley, was established under the leadership of Rev. Tong Liu in 1995, to fulfill the vision and mission from God to build a glorious church in the 21st century. This is a continuation of the vision and mission received by Rev. Zhao at Bread of Life Christian Church in Taiwan. We believe that a glorious church begins with individuals' lives. The development of all-rounded individuals depends on four major levers – Worship & Praise, Renewal by the Holy Spirit, Cell Church, and World Missions. God will send miraculous changes and blessings to our families, communities and nations through each of us. Visit www.rolcc.net and become our extended family at River of Life Christian Church, “ A Home for All Nations.”

About Delta Group

Delta Group is the world's largest provider of switching power supplies and DC brushless fans, as well as a major source for power management solutions, components, visual displays, industrial automation, networking products, and renewable energy solutions. Delta Group has sales offices worldwide and manufacturing plants in Taiwan, China, Thailand, Mexico, India and Europe. As a global leader in power electronics, Delta's mission is, “To provide innovative, clean and efficient energy solutions for a better tomorrow.” Delta is committed to environmental protection and has implemented green, lead-free production and waste management programs for many years.

More information about Delta Group can be found at www.deltaww.com.

About DelSolar Co. Ltd

DelSolar, a subsidiary of Delta Electronics, has become a leading solar cell and module provider with proven process innovation, state-of-the-art manufacturing technology, world-class cell efficiency, and record production yields since its inception in 2004.
