

DelSolar Wujiang Plant's Mass Production Ahead of Schedule

Release Date: June. 17, 2010

Issued by: DelSolar Co., Ltd

Wujiang, China, June 17, 2010 -- DelSolar Co., Ltd. (3599) today held a press conference to announce mass production is ahead of schedule at their Wujiang plant. Both solar cells and modules have successfully achieved mass production levels with production, production yields, efficiency and quality unity surpassing related indices.

In addition to distributing production and utilizing the existing resources of parent company Delta Electronics, DelSolar chose Wujiang as their base for China operations to obtain materials from local sources and provide on-site services for customers. The Wujiang plant implements the same quality control and environmental, safety and health policies as the company's Hsinchu plant in Taiwan. The revenue contribution of the Wujiang plant currently exceeds 30%, and the company expects this percentage to continue to increase.
